PROJECT MANAGEMENT

How to Benefit from AI (Artificial Intelligence) in Project Management

(AIPM)
(4 hours) (4 PDUs)
(In person or Virtual)

AI (Artificial Intelligence) is the latest trend in IT and correctly used it can become a very useful companion (assistant) to most people.

In this course you will learn how to benefit from AI in the management of projects, programs, portfolios and PMOs, thus turning an AI tool(assistant) into your new and very useful companion, helping you to become more efficient and thus save time.

AFTER THE COURSE YOU WILL KNOW ABOUT

- AI – Artificial Intelligence in general
- How to benefit from AI when starting up and managing your projects, programs, and portfolios

TARGET GROUP

- Project and Program Managers
- Sponsors and Business Owners
- Product Owners, Product Managers, Scrum Masters and RTEs
- Team Leaders and Members
- Line/Functional Managers
- PMO's Managers, Portfolio Managers and PMO Staff

TRAINING METHOD

You will experience a course with a high energy level and a lot of fun.
The course will partially be like a workshop where we will discuss and debate about how to benefit from, and apply, AI in the best possible way in the management of projects and programs.

PRE REQUISITIES

We recommend that the participants have at least fundamental project management knowledge.
