

AGILE IMPLEMENTATION WORKSHOP (AIW)

(ILT: 2 days, 16 hours, 16 PDUs)
(VCT: 4 days, 4*4 hours, 16 PDUs)

AFTER THE COURSE YOU WILL

- ❖ Have a better understanding of the principles of Lean – Agile management and how they can apply to your projects and in the customer interactions.
- ❖ Know the tools and Ways of Working in Agile projects and how they can be combined with structured (“traditional”) project management in so called hybrid or bimodal projects
- ❖ Develop a strategy and high level plan for how to implement Agile ways of working in your work environment

TRAINING METHODS

We apply a training method based on “learning by doing”.

This means optimizing your learning by combining the workshop leader’s input with your own experience and active participation. There will be a mixture of theory with workshop activities to be able to come up with a jointly agreed plan.

TARGET GROUP

- ❖ Core 3 Team Members
- ❖ Program Managers
- ❖ Project Managers
- ❖ PMO Managers
- ❖ Line Managers
- ❖ Directors

Today’s business environment requires a more agile and dynamic organization and new ways of managing projects.

Customers typically also require a more flexible and agile approach to defining requirements and scope of the projects.

This workshop aims to help an organization to define a way forward to better benefit from agile ways of working, especially in the customer interface and the development of customized solutions.
