

# PROGRAM MANAGEMENT (PGM) (2 days, 16 hours, 16 PDUs)

Program Management is maturing as a standardized way of working. In this course you will learn about the most important theories and standards, as well as how to implement program management based on the standards, the GPMM project management model and real-life experiences. The course also explains when and how to apply program management to ensure an efficient use of the resources available and to facilitate the overall project portfolio management.

## AFTER THE COURSE YOU WILL

- ❖ Know what a program is
- ❖ Why management by programs can be a better option, than project management or ongoing operations
- ❖ How to establish, manage and document a program
- ❖ How to manage and steer projects within a program
- ❖ Understand the role of the program manager

## TRAINING METHODS

We apply a training method based on “learning by doing” (also known as “accelerated learning”). This means optimizing your learning by combining the trainer’s input with your own experience and active participation.

The course is aligned with the Project Management Institute (PMI)<sup>®</sup> standards.

## PREREQUISITES

Knowledge in Project Management. Knowledge in a project management model such as GPMM is also recommended.

## SUBJECTS
