

AGILE FOR MANAGERS (AM)

(1 day, 4 hours, 4 PDUs)

Are the Agile methodologies applicable in my company? What are the managing paradigms on which Agile can be applied? Which are the advantages and challenges derived from the projects being managed in this way? How can the Agile methodologies coexist with other successful project management methods?

Looking at the successful implementation of Agile, the principles on which this way of working is based must be known by the management. This seminar tries to explain the management role, the decisions that they must make and the way they should support the Agile implementation.

AFTER THE WORKSHOP YOU WILL

- ❖ You will have a better understanding about the principles on which Agile methodologies are based.
- ❖ You'll be able to evaluate the conditions under which using the Agile management focus is interesting
- ❖ You'll be able to analyze the situations under which this is applicable in your organization and in your projects.
- ❖ You'll think about some of the key success aspects on the change initiatives and the mistakes to be avoided.

TRAINING METHODS

This is a seminar based on conferences and interactive talks. The intention is that the participants think about the course subjects and share their points of view with the rest of the assistants.

PREREQUISITES
