

STAKEHOLDER MANAGEMENT (STK)

Classroom (ILT): 1 day, 8 hours, 8 PDUs
Virtual (VCT): 2 days, 2*4 hours, 8 PDUs

Being able to efficiently manage the influences of everyone who may affect, or be affected by a project, is one of the key elements to project success.

Controlling the information, the relationships and the influences helps us control the project. This course delves into tools, techniques, and skills specific to efficient stakeholder management in projects.

The course is aligned with the Project Management Institute, A Guide to the Project Management Body of Knowledge (PMBOK® Guide) – Fifth Edition, Project Management Institute, Inc., 2013

AFTER THE COURSE YOU WILL

Have learned techniques and developed skills to be able to:

- ❖ Make a good stakeholder identification
- ❖ Identify the influence of each individual stakeholder.
- ❖ Get the right kind of involvement from the right people.
- ❖ Control their impact on project objectives

TARGET GROUP
