We are more than **30 trainers, consultants and project managers.**

Experience from more than 70 countries.

OUR VISION

To be recognized as an agile world leading and innovative Project Management competence center.

OUR MISSION

Our Mission is to help our clients to achieve Outstanding Business Results through Great Project Performance – realized by the Best Project Management, enabled by an Excellent Project Culture.

OUR TOTAL SOLUTION

We contribute with extensive experience and competence, and our Project Management 3.0 framework.

Our total solution combines:

- Project Models and Tools
- Training and Competence Development
- Consulting Services
- Project Managers & PMOs

REFERENCES

We work with major international companies and with SMEs. We have experience from many different sectors, but especially in the Telecom, Financial, IT, Railway, NGO, Energy and Industrial sectors.

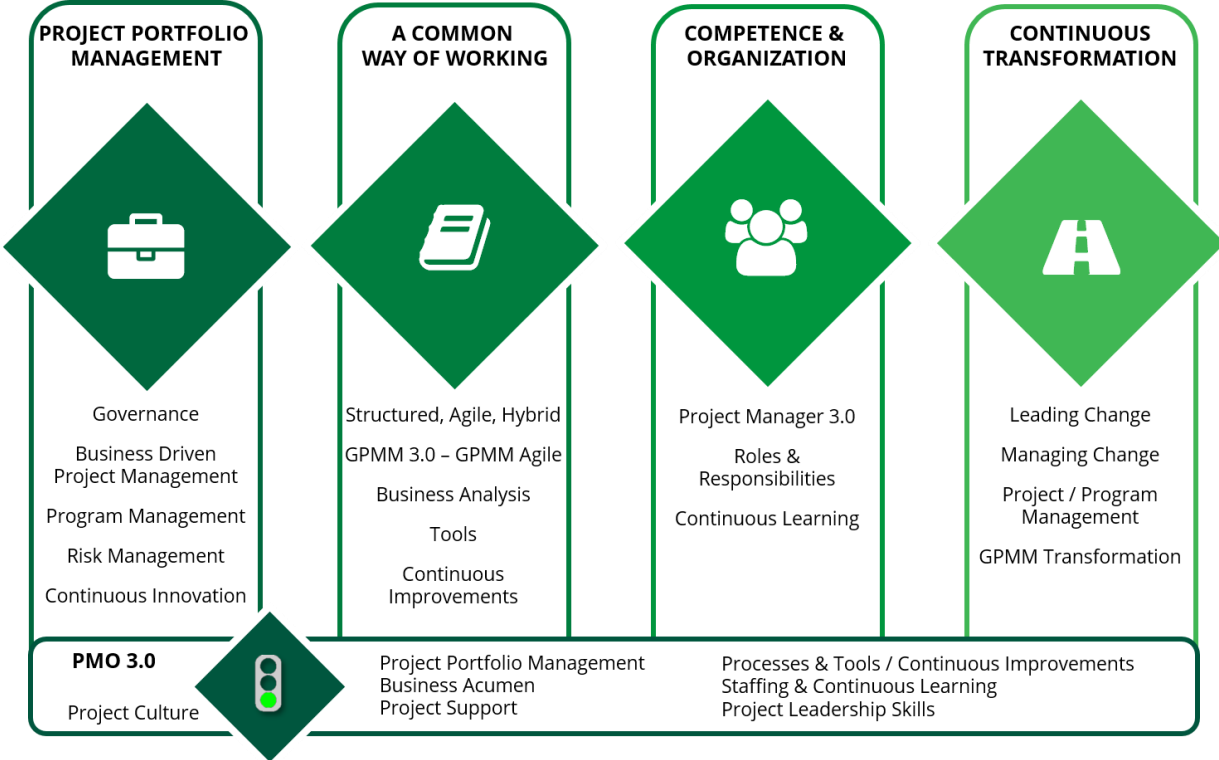

It is widely known that only 3 out of 10 projects actually finish successfully, meaning that the scope and the goals are delivered on time and within budget.

This means that a lot of effort and financial resources are wasted.

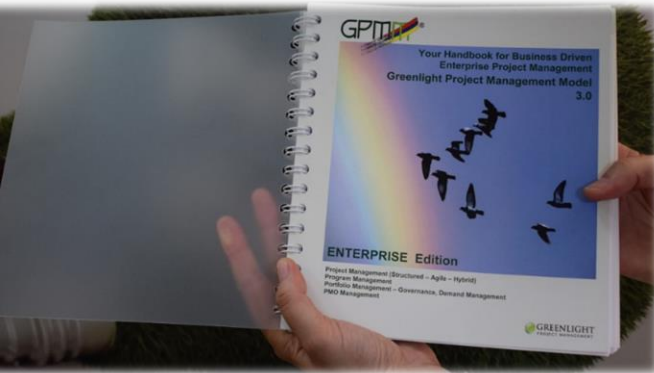

The Project Performance is much better in organizations with a good and common Project Culture!

We have defined what we call a **Business Driven Project Management Culture**, which we believe all organizations should strive for, if they depend on project management.

We recommend to analyze and act using the Project Management 3.0 Framework as a base.

PROJECT MODELS & TOOLS

A **Project Model / Methodology** is the base for building a common and efficient Project Culture

A **Project Model** specifies what, when and how it is to be done in the project, the program and in project portfolio management

The Model is used together with **Project Management Tools**.

GPM®, is a World-leading project management model, and it is delivered in many formats; Book, ebook, internet / intranet pages and as a solution integrated in PM tools.

It conforms to all the key standards and other best practices like PMI®, IPMA, CMMI, BABOK®, Agile Manifesto, Prince2®, PMD Pro, SAFe®, PROPS® etc), and it is enriched, since 1989, with real experience from tens of thousands of users.

Based on **GPM®** we also develop customized methodologies, considering existing good practices and the tools being used.

We also help our customers to implement **Project Management Tools** – with Selection, Customization, Implementation and Training.

TRAINING and DEVELOPMENT

“Learning by Doing”

- “Accelerated Learning”
