

TOTAL SOLUTION

The goal of our service is to help customers achieve a Common and Business Driven Project Culture. The objective is to work on a profitable Project Portfolio, helping individual projects and programs to systematically meet their scope, cost and quality goals.

To get there, we integrate in a Total Solution for culture change: Project Models, Training and Competence Development, Consulting Services, Project Managers and PMOs.

THE WAY WE WORK

We suggest to start by analyzing the current situation, ending the Analysis with a workshop with the Management Team. The goal of this phase is to identify the Vision and the Long Term Goals, as they are the basis for the development of the action plan.

In many cases, the key starting action is the establishment of a PMO (a Project Management Office) and the development of a Project Model. The Model is essential to get the common and business driven Project Culture, and the PMO will be the driver for the change process and one of the main receivers of the deliverables.

During the implementation we will focus on achieving a Matrix Organization, Roles and Responsibilities, A Customized Project Management Model based on GPM – Greenlight Project Management Model, Project Portfolio Management, individual Project and Program Management, Training for all stakeholders, the Human perspective, Tools and Continuous improvement.

The initiative can be managed as a project or program using the GPM Transformation Model and the actual deliverables, to also serve as a pilot and best practice in itself.
