

SCRUM MASTER ROLE (SMR) (1 day, 8 hours, 8 PDUs)

Scrum Master Role is very important in the development and efficiency of the Agile teams and in the application of the Scrum methodology in the project management. This course will provide you with the specific information to perform this role and undertake the daily activities that you will have in front of you as responsible of the implementation of the Agile Scrum methodology.

AFTER THE COURSE YOU WILL

- ❖ Get the abilities for facing the activities needed in the Agile Scrum projects.
- ❖ Help the teams in their auto-organization.
- ❖ Know to manage the handicaps that hold up the efficiency of the teams.
- ❖ Know how to use the typical metrics of the Agile projects to measure the speed and progress.
- ❖ Know the coaching skills and abilities needed to help the teams to improve and be more efficient.

TRAINING METHODS

- ❖ Practical course. The training method used is based on “learn by doing”. This means optimize the learning using the trainer knowledge plus your experience and your active participation.
- ❖ We spend time in the personal feedback during the exercises.
